

4.6.1 Derivation and types of three-component systems

Different three-phase systems with possible invariant reactions:

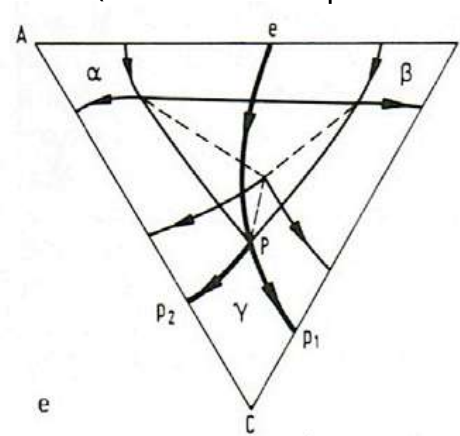

ternary eutectic
(from 3 binary eutectics)

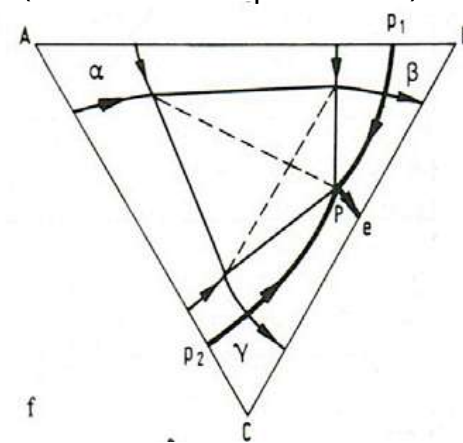

ternary quasi-peritectic
(from 3 binary eutectics)

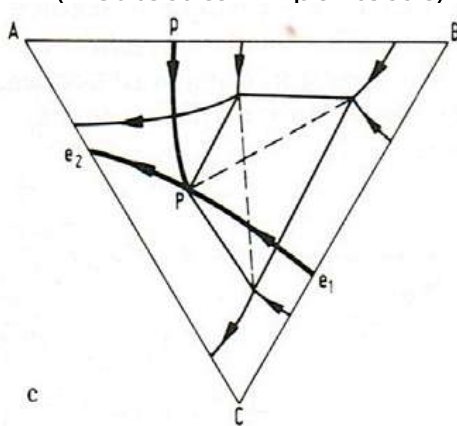

ternary peritectic
(1 eutectic + 2 peritectics)

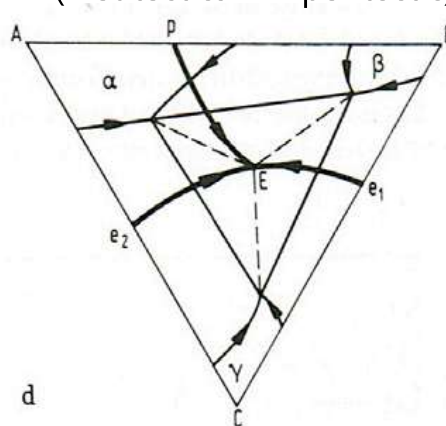

ternary quasi-peritectic
(1 eutectic + 2 peritectics)

ternary quasi-peritectic
(2 eutectics + 1 peritectic)

ternary eutectic
(2 eutectics + 1 peritectic)

ternary eutectic
(1 solution system + 2 eutectics)
